

COMPUTER SCIENCE STUDENT WINS LAPTOP

Friday, June 3, 2016

A brand new laptop, provided by the TEALS (Technology Education and Literacy in Schools) organization, was awarded to one Monroe High School Computer Science student at today's pep assembly.

The laptop recipient was selected by raffle. Computer Science students earned raffle tickets by helping classmates solve programming problems or by moving the class forward in other ways.

The laptop was presented by Computer Science teacher, Jim Bogesvang, two Microsoft representatives, and MHS Principal John Lombardi.
