

November 4, 2009

Dear Fryelands families,

All students and staff safely returned to their classrooms this morning after our school's fire alarm sounded at about 10:30 a.m. Fire crews responded quickly and found a motor in one of the school's many heat pumps had seized causing the system to overheat. Power was cut to that unit until repairs are completed.

Fryelands staff and students routinely practice evacuation plans and all went according to that plan this morning. Many thanks to the responding fire crews from Monroe, Snohomish and Sultan. Monroe Police officers were very helpful in directing traffic and rerouting families picking up morning kindergartens students.

We are all thankful today was a dry and sunny day! Please let me know if you have any questions or concerns.

Sincerely,

Jeff Presley

Principal
